S.Venkatesh

Chennai, India
(+91) 9710700734
svenkatesh0804@gmail.com

Senior iOS Developer with 7+ years of experience in developing scalable, user-centric, and high-performance iOS applications using Swift.

EXPERIENCE

Haoda Group, Chennai — *Senior iOS Application Developer*

November 2024 - May 2026

Developed banking application features including fund transfers, transaction history, account management, and secure authentication.

Sciflare Technologies Pvt Ltd, Chennai — *Senior iOS Engineer*

April 2022 - October 2024

Developed a fantasy sports iOS application with live scores, match schedules, player statistics, team management, and contest participation.

Team Tweaks Technologies Pvt Ltd, Chennai — *iOS Developer*

February 2021 - February 2022

I worked in a service-based company developing and maintaining iOS applications across e-commerce, GIF, and enterprise domains.

Adyog Software Solutions Pvt Ltd, Chennai — *Software Developer*

February 2019 - January 2021

Worked on e-commerce, on-demand service, and news iOS applications.

EDUCATION

K.C.G College of Technology (Anna University), Chennai — *Bachelor of Engineering(CSE)*

June 2014 - May 2017

P.S.B Polytechnic College (DOTE), Chennai — *Diploma(CSE)*

June 2012 - May 2014

SKILLS

Apple
iOS
Swift
Objective-C
UIKit
SwiftUI
Autolayout
Combine
Bluetooth
AVKit
REST Api's
GraphQL API's
Flutter
React-Native

LANGUAGES

Tamil, English

TOOLS

XCode
VSCode
Postman

DESIGN PATTERN

MVC
MVVM

PROFESSIONAL EXPERIENCE & EXPERTISE

- **7+ years of experience** in designing, developing, and maintaining native iOS applications using **Swift** and **UIKit**.
- Strong experience in developing responsive **iPhone and iPad** applications following **Apple Human Interface Guidelines (HIG)**.
- Proficient in building user interfaces using **UIKit, Storyboards, XIBs, Interface Builder, and Auto Layout (NSLayoutConstraint)**.
- Experience implementing **MVVM**, **MVC**, and **Clean Architecture** patterns.
- Strong knowledge of **Swift Concurrency (async/await)**, **Grand Central Dispatch (GCD)**, **OperationQueue**, and **Combine**.
- Experience integrating **RESTful APIs**, **GraphQL APIs**, and parsing **JSON** responses.
- Hands-on experience with **Core Data**, **UserDefaults**, **Keychain**, and secure local data storage.
- Strong experience with **Bluetooth Low Energy (CoreBluetooth)**, including scanning, pairing, data communication, and auto-reconnection.
- Experience integrating **Firebase** (Analytics, Crashlytics, Cloud Messaging, Remote Config) and push notifications.
- Proficient with third-party libraries using **Swift Package Manager (SPM)** and **CocoaPods**, including **Alamofire**, **Nuke**, and other SDKs.
- Experience integrating **Apple Maps**, **Google Maps**, location services (**Core Location**), and geofencing.
- Strong knowledge of iOS frameworks including **AVKit**, **Photos**, **NotificationCenter**, **Network**, and **Core Location**.
- Experience implementing **social authentication** (Google, Apple Sign-In, Facebook) and payment gateway integrations.
- Skilled in **memory management**, performance optimization, Instruments profiling, and debugging.
- Experience with **Git**, code reviews, Agile/Scrum methodologies, and CI/CD workflows.
- Strong analytical, debugging, and problem-solving skills with a focus on writing clean, maintainable, and scalable code.
- Solid understanding of the complete **software development lifecycle (SDLC)**, from requirements gathering to App Store release.
- Experience managing **App Store Connect**, **TestFlight**, provisioning profiles, certificates, and production releases.
- Successfully developed, maintained, and published **17+ iOS applications** on the App Store.

PROJECTS

Haoda Payment

Project Description

- ❖ Developed a secure enterprise iOS payment application integrated with Axis Bank APIs through the backend server using Swift, UIKit, and MVVM.
- ❖ Implemented features including account balance, transaction history, beneficiary management, and single/bulk payments with Excel file upload.
- ❖ Integrated REST APIs, ensured secure authentication, and delivered a high-performance, user-friendly payment experience.

Roles & Responsibilities

- ❖ Responsible for the end-to-end development, maintenance, and delivery of all iOS applications, from requirement analysis to App Store release and production support.
- ❖ Developed new features, integrated RESTful APIs, optimized application performance, fixed production issues,

and collaborated with cross-functional teams using Agile methodologies.
- Followed iOS best practices, conducted code reviews, managed source code with Git, and ensured high-quality, scalable, and secure applications.

American Dream11

Project Description

- Developed a fantasy sports iOS application for the US market, enabling users to participate in cricket and football contests, view live scores, create fantasy teams, and compete for real-money prizes.
- Integrated secure payment gateway (**CCAvenue**) for wallet recharge and contest entry fees, along with REST APIs for live match data, user profiles, contests, and leaderboards.
- Built the application using **Swift, UIKit, MVVM, REST APIs, Auto Layout, and Git**, ensuring a responsive and high-performance user experience.

Roles & Responsibilities

- Led the end-to-end iOS development of the application alongside one junior iOS developer, delivering features from requirement analysis through production release.
- Designed and implemented modules including user authentication, live scores, contest participation, team creation, wallet management, payment integration (CCAvenue), and push notifications.
- Collaborated with backend, QA, and product teams, integrated RESTful APIs, optimized application performance, resolved production issues, and managed App Store releases and maintenance.

Fantasy Sports Pro

Project Description

- Developed a fantasy sports iOS application featuring **Cricket, Football, and Basketball**, where users create fantasy teams, join coin-based contests, and compete using virtual coins instead of real money.
- Implemented features including live scorecards, match schedules, leaderboards, daily bonus coin rewards, wallet management, and contest participation through REST API integration.
- Built the application using **Swift, UIKit, MVVM, REST APIs, Auto Layout, and Git**, delivering a responsive, scalable, and engaging user experience.

Roles & Responsibilities

- Developed and maintained core iOS modules including user authentication, fantasy team creation, coin wallet, contest management, live scores, leaderboards, and user profile.
- Integrated RESTful APIs, implemented reusable UI components, optimized application performance, fixed production issues, and collaborated with backend, QA, and product teams in an Agile environment.
- Participated in the complete application lifecycle from requirement analysis and development to testing, App Store deployment, and post-production support while following iOS development best practices.

Boomer11 Sports

Project Description

- Developed a fantasy sports iOS application for a **UAE client**, featuring **Cricket, Football, and Basketball**, where users participate in virtual coin-based contests, create fantasy teams, and earn reward coins without real-money betting.
- Integrated **Shopify** for e-commerce, allowing users to purchase products and earn bonus coins, which could be used to join contests and redeem rewards.
- Implemented **REST APIs**, **GraphQL APIs**, and **CCAvenue Payment Gateway** using **Swift, UIKit, MVVM, Auto Layout, and Git** to deliver a secure, scalable, and high-performance application.

Roles & Responsibilities

- Developed and maintained core iOS modules including authentication, fantasy team creation, contest management, virtual coin wallet, live scorecards, leaderboards, rewards, and e-commerce integration.
- Integrated **REST APIs**, **GraphQL APIs**, **Shopify**, and **CCAvenue Payment Gateway**, ensuring seamless communication with backend services and secure payment workflows.
- Collaborated with backend, QA, and product teams throughout the complete development lifecycle, optimized application performance, resolved production issues, and managed App Store releases and maintenance.

Logistics Driver

Project Description

- Developed and supported the iOS **Driver Application** for a logistics platform, enabling drivers to receive delivery requests, accept or reject orders, navigate to pickup locations, and complete deliveries.
- Implemented real-time order updates and notifications using **Firebase Realtime Database**, ensuring timely synchronization of delivery status between drivers and the backend.
- Built the application using **Swift, UIKit, REST APIs, Firebase, Auto Layout, and Git**, focusing on a smooth and reliable delivery workflow.

Roles & Responsibilities

- Developed and maintained the driver workflow, including **order acceptance, cancellation, pickup confirmation, and delivery completion**.
- Integrated **Firebase Realtime Database** for real-time order status updates and collaborated with backend and QA teams to resolve issues and improve application stability.
- Provided feature enhancements, bug fixes, and production support for the iOS Driver application while following iOS development best practices.

Methanol Fuel Cell

Project Description

- Developed a custom enterprise iOS application for monitoring and configuring **Methanol Fuel Cell** devices using **Core Bluetooth (BLE)**. The application was built exclusively for the client organization and was not publicly available on the App Store.
- Implemented Bluetooth Low Energy (BLE) communication to discover, connect, read, and write characteristics, enabling real-time data exchange with the client's microcontroller-based hardware.
- Built using **Swift, UIKit, Core Bluetooth, MVVM, REST APIs, and Auto Layout**, providing real-time device monitoring, configuration, and status visualization.

Roles & Responsibilities (3 lines)

- Designed and developed the complete iOS application, implementing BLE scanning, device connection, service and characteristic discovery, data read/write operations, and automatic reconnection.
- Worked closely with the embedded systems team to integrate with the microcontroller, parse BLE data packets, display real-time device parameters, and send configuration commands.
- Optimized Bluetooth communication, handled connection lifecycle and error scenarios, resolved production issues, and delivered a stable enterprise application tailored to client requirements.

Gifex – Gif Maker

Project Description

- Enhanced and maintained an existing **GIF Maker** iOS application that allows users to create GIFs and videos by combining multiple images with customizable editing options.

- Redesigned and updated the complete application UI, refreshed branding including the app icon, and created a new version of the application with an improved user experience.
- Integrated **Apple In-App Purchases (StoreKit)** to unlock premium features and subscriptions, using **Swift, UIKit, Auto Layout, and REST APIs**.

Roles & Responsibilities

- Redesigned and implemented the UI across the application, updated screens, improved user experience, and customized the app branding for a new product version.
- Integrated **Apple In-App Purchase (StoreKit)** for premium feature access and ensured seamless purchase and restore workflows.
- Performed application maintenance, bug fixing, performance optimization, testing, and App Store release support while collaborating with the product and QA teams.

Nagercoil.com

Project Description

- Developed a **multi-service iOS application** that provides **grocery, food & drinks, medicines, transport, tours & travels**, and other on-demand services through a single platform.
- Implemented **Google Maps** for real-time location tracking, order management, and delivery updates, along with **Stripe Payment Gateway** for secure online payments.
- Built the application using **Swift, UIKit, MVC, REST APIs, Google Maps SDK, Stripe SDK, Auto Layout, and Git**, delivering a seamless and scalable user experience.

Roles & Responsibilities

- Independently developed the complete iOS application, implementing modules including user authentication, service listings, cart, order management, map-based location tracking, and booking workflows.
- Integrated **RESTful APIs**, **Google Maps SDK**, and **Stripe Payment Gateway**, ensuring secure payments, real-time location updates, and smooth communication with backend services.
- Managed the complete development lifecycle, including UI implementation, feature development, bug fixing, performance optimization, testing, App Store deployment, and post-production support while collaborating with backend and QA teams.

Vanakkam Malaysia News

Project Description

- Developed a **news and media iOS application** for a Malaysia-based client, providing users with the latest news articles, videos, and live streaming content across multiple categories.
- Integrated **YouTube SDK** for video playback and live streaming, along with **Google Sign-In** to enable authenticated users to like, comment, and access personalized content.
- Built the application using **Swift, UIKit, MVC, REST APIs, Google Sign-In, YouTube SDK, Auto Layout, and Git**, delivering a secure and engaging user experience.

Roles & Responsibilities

- Independently developed the complete iOS application, implementing news feeds, video streaming, live TV, article details, user authentication, and profile management.
- Integrated **REST APIs**, **Google Sign-In**, and **YouTube SDK**, implementing authentication-based features such as likes, comments, and access to restricted content for signed-in users.
- Managed the end-to-end development lifecycle, including UI implementation, API integration, debugging, performance optimization, testing, App Store deployment, and post-production support in collaboration with

backend and QA teams.

FarmFreshHandPicked

Project Description (3 lines)

- Enhanced and maintained an existing **grocery shopping iOS application** for a Chennai-based retailer, enabling users to browse products, manage carts, place orders, and choose **online payment or Cash on Delivery (COD)**.
- Redesigned the complete application UI, improved the shopping experience, and integrated **Razorpay Payment Gateway** for secure online payments while supporting manual address-based delivery.
- Built using **Swift, UIKit, REST APIs, Razorpay SDK, Auto Layout, and Git**, delivering an intuitive and responsive e-commerce experience.

Roles & Responsibilities (3 lines)

- Redesigned and implemented the complete application UI, updated user flows, and modified existing functionalities based on new business and design requirements.
- Integrated **RESTful APIs**, **Razorpay Payment Gateway**, cart management, checkout, delivery address, contact information, and order placement features.
- Performed application maintenance, bug fixing, UI enhancements, performance optimization, testing, and production support while collaborating with backend and QA teams.

Staybula

Project Description

- Developed a **travel and tourism iOS application** that allows users to explore tourist destinations, travel packages, and local guide services through a single platform.
- Implemented features for browsing destinations, package details, guide information, booking services, and secure online payments using the **PayPal Payment Gateway**.
- Built the application using **Swift, UIKit, MVC, REST APIs, PayPal SDK, Auto Layout, and Git**, delivering a seamless and user-friendly travel booking experience.

Roles & Responsibilities

- Independently developed the complete iOS application from requirement analysis to deployment, implementing destination listings, package details, guide profiles, booking workflows, and user management.
- Integrated **RESTful APIs** and **PayPal Payment Gateway**, ensuring secure payments and smooth communication with backend services.
- Managed the complete application lifecycle, including UI development, API integration, bug fixing, performance optimization, testing, App Store deployment, and post-production support while collaborating with backend and QA teams.

Sathiyam TV Tamil News

Project Description

- Maintained and enhanced the **Sathiyam TV Tamil News** iOS application, providing users with the latest Tamil news, videos, and live TV streaming.
- Implemented UI enhancements, bug fixes, and feature improvements to improve application stability, performance, and user experience.
- Built and maintained the application using **Swift, UIKit, REST APIs, Auto Layout, and Git**.

Roles & Responsibilities

- Maintained the existing iOS application by implementing UI changes, fixing bugs, and enhancing existing features based on business requirements.
- Integrated and maintained RESTful APIs, resolved production issues, optimized application performance, and ensured application stability.
- Collaborated with backend, QA, and product teams for testing, maintenance, App Store releases, and post-production support.

IndependentSG

Project Description

- Maintained and enhanced a **news iOS application** that delivers daily news articles across various categories, allowing users to browse news feeds and read detailed articles.
- Improved the application's user interface, performance, and overall stability while ensuring seamless content updates through REST API integration.
- Built and maintained the application using **Swift, UIKit, REST APIs, Auto Layout, and Git**.

Roles & Responsibilities

- Maintained the existing iOS application by implementing UI enhancements, fixing bugs, and improving application performance and stability.
- Integrated and maintained **RESTful APIs** for retrieving daily news feeds and detailed news content, ensuring a smooth user experience.
- Collaborated with backend and QA teams to resolve production issues, perform testing, support App Store releases, and provide ongoing application maintenance.
